DuPont™ Tyvek®  
padding

Rx only. **Warning: Read all package insert warnings, cautions and instructions prior to use. Failure to do so may result in severe patient injury or death.**

Sterilized using ethylene oxide unless otherwise indicated in the contents list.

**California Prop. 65**

**Warning: Cancer and Reproductive Harm** [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

Fluid path components are non-pyrogenic.

**Contraindications: This device is contraindicated wherever there is presence of device related infections, previous or current thrombosis. Clinical assessment of patient must be completed to ensure no contraindications exists.**

STERILE EO

~~LATEX~~

Not made with natural rubber latex

Store between 20 - 25°C (68 - 77°F). Avoid freezing and excessive heat above 40°C (104°F).

Lumen	Priming Volume* (mL)	Flow Rate† (mL/hr)	Pump Flow Rate‡ (mL/hr)
Distal (18 Ga.)	0.52	850	3700

\* Priming volumes are approximate and are done without accessories.  
 † Flow rates are done with normal saline, room temperature, 100 cm head height and represent approximate flow capabilities.  
 ‡ Pump flow rates are determined at maximum pump pressure of 10 psig.

Above values apply to the untrimmed catheter. Trimming the catheter will alter priming volumes and flow rates.
