\* Priming volumes are approximate and are done without injection caps.  
† Flow rates were determined using room temperature water, 100 cm head height and represent approximate flow capabilities.  
‡ Pump flow rates are determined at maximum pump pressure of 10 psig and represent approximate flow capabilities.  
\*\* Pressure injection flow rates are determined at the injector pressure setting of 300 psi maximum using media of 11.8 centipoise viscosity, with 152 cm pressure tubing.
